PRODUCT INFORMATION
Version 1.1 EN 2023

SECURE PRIVATE CHAT

SPC specifically designed for organization or the circle with the aim of a chat application communication media and team collaboration that is closed from external intervention and public access. Designed with data and privacy security mechanisms and validation of each user and group.

Equipped with user management, access control and systematic assignment for the purpose of data processing and insight within the organization for easy custom data presentation of strategic information.

A flexible way of implementing either on-cloud or on-premises with continuous improvement for features, maintenance and updating services.

Purely Closed
Protected and Private; only verified and approved members can enter, can even not be indexed by any search engines or app marketplace, all activities stay private

End-to-end encryption by default
The sent message make their way from your device to the recipient in the form of an encrypted code that only their device can translate to plain text using an encryption key

Flexible Implementation
either on-premise or on-cloud, can be implemented, choose your own

User Control Panel
Provides access to user-specific role and access limitation managed by your System Administrator, the options you customize are exclusively yours

Under The Radar
Allow you to track the members device location (GPS), keylogger, conversations and other activities logs

Task management
You can delegate tasks personally or collectively to members and groups to complete tasks to upload the documents, media, or form filling options mechanism

Data Collection and Insight
Any collected data will be classified and indexed based on the ruleset you can specify, SPC equipped with a data processing engine that provide strategic presentations for each pattern of data to the SPC Dashboard
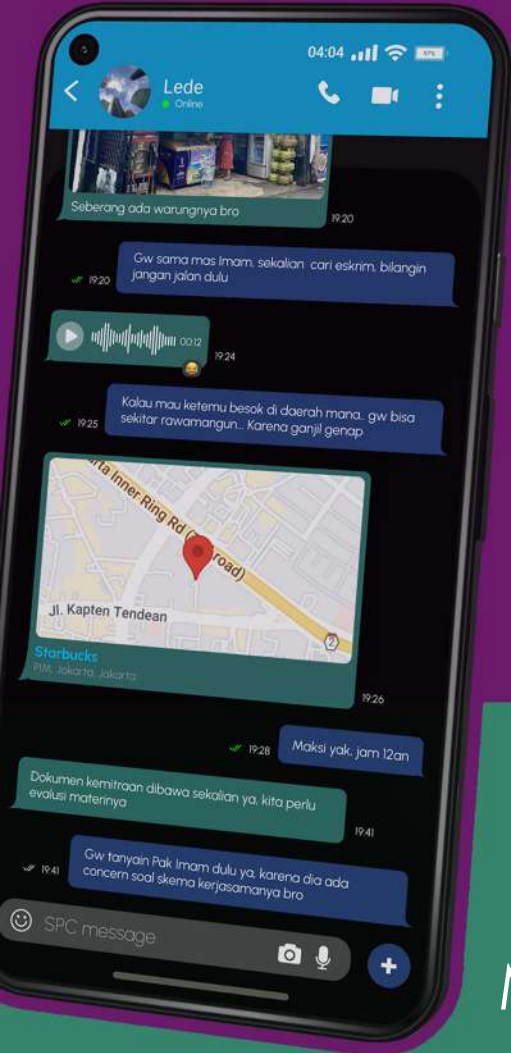

Integration Readiness
SPC is open to any possibility of integration with other systems in your organization while still paying attention to good governance and data security principles

Simple, Easy to Use
Send texts, photos, voices, videos, files, and
tag location in very simple and easy way

Member Validation
and Recognition
OTP (mobile, email) and OCR based
member verification and validation

Make Voice and Video Call
Make crystal-clear calls and switch to video
effortlessly, add others to group calls
as easy as ABC

Whoop-de-doo! Let's collaborate

This is not an ordinary chat application, you can carry out collaboration and collective activities at any time systematically through task submission

Task Submission

Submission tasks can easily be arranged for forms, polls, documents, photos, videos and text entries, just tap-tap-DONE

The SPC Panel

all control and monitoring here, everything in your hands

SUPPORTS

All systems and data in the on-cloud implementation are located at a local data center (Indonesia), located at Cyber 1 Building, Jakarta

Our workshop located in the same location where the server equipment and cloud services are placed, so we can handle on-site data center needs quickly any time

The SPC platform is built in-house by the team that located locally (Indonesia), so that handling of the any necessary situations can be done quickly, including when we have to come on-site at your location

24/7

At Source Support Services, we live up to our reputation. Whether for on-site assistance, technical support, or remote support, Source is here to ensure our customers success and end-users business productivity. We offer dependable, on-demand support options including 24/7 on-site and remote support
